Psychological Phobias - AllAboutCounseling.com Understanding Unreasonable Fear. Psychological phobias are what most people think of when the term "phobia" is mentioned; an intense and unreasonable fear, despite clear evidence that such fear is not necessary. There are hundreds of different psychological phobias that can appear in patients for different reasons. What Is a Phobia? - Verywell Mind According to the American Psychiatric Association, a phobia is an irrational and excessive fear of an object or situation. In most cases, the phobia involves a sense of endangerment or a fear of harm. Phobia | psychology | Britannica.com Phobia: Phobia., an extreme, irrational fear of a specific object or situation. A phobia is classified as a type of anxiety disorder, since anxiety is the chief symptom experienced by the sufferer. Phobias are thought to be learned emotional responses. It is generally held that phobias occur when fear.

Figuring out phobia - American Psychological Association Figuring out phobia. Researchers are using neuroimaging techniques to delve into the neurobiological underpinnings of phobias, with a view to improving treatments. Specific Phobia | Psychology Today As its name suggests, a specific phobia is an unrealistic or extreme fear of a specific situation, object, or setting that might make the average person only slightly uncomfortable or that most. The Psychology Behind Phobias - PsychologyCareerCenter The anxiety experienced when confronted by a phobia is also different from the anxiety experienced during a panic attack. People with panic disorders experience anxiety, known as panic attacks, with little reason or warning and strongly believe the anxiety is related to something that is medically wrong with them.

Fears and Phobias - Psychologist Anywhere Anytime Treatment of Phobias: The most frequently used form of therapy for the treatment of specific phobias is a type of cognitive behavioral therapy called systematic desensitization or exposure therapy. According to the National Institute of Mental Health, about 75% of people with specific phobias overcome their fears through cognitive-behavioral.
